- Trajan. ...
- Futura. ...
- Bodoni. ...
- Zorus Serif. ...
- Sabo. ...
- Bobber.

Script typefaces that look like joined up handwriting with curves, loops and swirls that flow between letters so they each appear joined, whereas decorative typefaces have embellishments or decorative elements added to them. ... As well, decorative typefaces may only include fonts in capital letters.

- What is the difference between sans serif and serif

- The answer is simply in the name. A serif is a decorative stroke that finishes off the end of a letters stem (sometimes also called the "feet" of the letters). In turn, a serif font is a font that has serifs, while a sans serif is a font that does not (hence the "sans").
