

Mathematics Homework

In the mathematics department, students will be given homework from a variety of different resources. Below you will find examples of these and how they can be categorised into preparation, consolidation or deepening of their learning.

KS3 Mathematics homework

Prepare	Consolidate	Deepen	Intervention
Setting work that involves using previous learning that relates to new learning Use Mathswatch/Youtube to look up topics before a lesson Use lessons available on Mymaths to look up topics in advance of a consolidation or deepen homework task	Complete work set in class Maths genie (exam question) booklets Kerboodle homework book tasks Practice questions (worksheets) or any other resource available Mymaths section 1 questions	Prepare a guide/revision poster for a topic Mymaths section 2 questions for all tasks involve problem solving and challenge questions	Booster packs on Mymaths – extra support if needed.
